WHO WE ARE?

Our lineup of experiential marketing includes solutions such as video walls, interactive kiosks, LED displays and customized software products. Over the years, we have worked with clients across industries such as retail, hospitality, F&B and automotive to serve their various marketing and advertising needs, and continue to generate results for them.

COMPANY'S VISION

Our vision is to lead the way to the future of experiential marketing in the region and evolve with the times to adapt to new technologies, thus ensuring a perpetual cycle of innovation. We aim to be the premier organization operating in the GCC that provides the complete range of digital signage solutions to all segments under one roof.

CORE DRIVERS

Quality of service, cost of innovation and sustainability of solutions are the key drivers of our business. Customer satisfaction is at the core of everything we do, and defines the drivers that our key to our work.

COMPANY'S MISSION

To leverage innovative and cutting-edge technology in the field of digital signage to help our clients achieve the wow-factor they are aiming for. We ensure that our solutions are of outstanding quality, value for money and instill a sense of pride in our clients. Customer satisfaction is at the core of everything we do.

The History

MindSpace Marketing Management and Brand ME Advertising are sister companies based in Dubai, with a combined strength of over 80 employees. Started in 2010, we have worked with over 300 companies in the fields of signage, digital marketing, printing, display stands, joinery, exhibitions and interiors. We operate out of three office locations in Dubai, which include two 10,000 square feet warehouses in Ras Al Khor, and one corporate office in Garhoud.

Our work culture is young and established at the same time, having our core values of growth, success and leadership infused in every aspect of our work. In the early days of the company, the core solutions we provided were in the domain of signage and printing. After successfully establishing ourselves as a force in these fields, over time a greatly expanded line of products and services were developed around the founding team and work culture.

OUR PORTFOLIO

Our Portfolio Companies

Since 2010, we have worked with over 300 companies to serve their advertising and marketing needs. We have served businesses from various industries and of different sizes- small, medium and large. Our clients are located in UAE, Saudi Arabia, Oman, Kuwait, Bahrain, Nigeria, Cameroon and Seychelles.

WHAT WE DO?

DIGITAL VIDEO WALL

A video wall is a set of screens combined together in a particular way, to create a portrait or landscape digital wall. It is typically used to grab the attention of potential customers and to create a wow-effect. Visual media content can be played on a video wall, which can be pushed through USB or remotely over Wi-Fi using a content management system.

The bezel of each screen is super thin, which ensures that the video wall creates a perception of being a large singular digital screen. It comes in full HD display, supports more than 20 file formats and has various screen sizes available.

SEAMLESS LED SCREEN

LED screens are composed of various pixel modules, with a pitch ranging from 3mm to 25mm. The selection of the pitch depends on the minimum viewing distance required for the LED screen application. The lower the pitch, the lower is the minimum viewing distance. Surface-mounted-device Light-Emitting Diode screens can be viewed from a wide angle, and are incredibly rich in resolution. They are mostly used in outdoor applications to play visual marketing content, and to reach out to a large audience.

WHAT WE DO?

Digital kiosks have compact designs that enable businesses to use them across various applications. It can be used to display information, promote a product or even take customer feedback. They can be of two types- interactive and plain. Interactive kiosks come with a touch screen, and essentially respond to user inputs via touch. Digital kiosks are mostly used in retail, F&B, hospitality and the health industry. The screen sizes vary, and range from 43" to 65" depending on your requirement.

INTERACTIVE KIOSK

RENTAL DIGITAL SIGNAGE

We rent out digital signage solutions for a number of days or months. Events and exhibitions are the ones most likely to rent our video walls, digital kiosks and LED screens. This is an effective strategy for many companies, and helps them to save upfront costs while still providing a wow-factor to their customers at special events.

WHAT WE DO?

DIGITAL MENU BOARD

Restaurants are embracing digital menu boards faster than ever. Light-boxes are slowly but surely being replaced by digital menus across the region. Digital menu boards are typically 4 to 5 screens placed adjacent to each other, and play content via USB or Wi-Fi through a content management system. The advantages are many over the traditional light-boxes. Restaurants with constant promotional activity and changing menu and prices are the ones most likely to adopt digital menus.

DIGITAL WAYFINDING

When people visit your company, your shop or mall, it is necessary to make a great first impression by helping them find you faster and by guiding and greeting them on every step of the way. Way finding Digital Signage does a brilliant job by helping navigators to reach their destination. Digital Wayfinding by MindSpace Digital Signage will assist your audience with detailed and appropriate directions in a rich format using touch screen technology. Interactive wayfinding kiosks provide various advantages as compared to a traditional way finder, by leveraging the right technology fused with an aesthetic 3D layout.

WHAT WE DO?

CURTAIN LED DISPLAY

Transparent LED screens find application across various industries and use cases, such as luxury brand advertising, fixed-installation applications and window advertising solutions. Some of the important characteristics that define transparent LED are high transparency index, modular design, light weight, near-perfect flatness, high brightness and stable performance.

Depending on the pixel pitch, the minimum viewing distance will change too. Premium stores, shopping malls and luxury chains find the transparent LED most suitable for advertising and eye-catching displays. The primary role of curtain LED is to unleash your creativity without affecting the aesthetics of your display and showroom setup.
